BLACKVUE™

INSTALLATION INSTRUCTIONS FOR BLACKVUE DR900S, DR750S, DR650S
### DR650GW, DR600GW, DR590, DR490, DR470, DR450, DR430

TAB

TAB

BUSHING STRIPS ARE USED FOR THE SMALLER DIAMETER DASHCAMS. DR590, DR490, DR470, DR450, AND DR430

1 - To install the dashcam into the mount, simply squeeze the two tabs of the spring clip together as shown above. This will increase the diameter of the spring clip and allow you to slide the dashcam into position. Once the dashcam is in position, release the two tabs. The dashcam is now securely attached to the mount.

2 - Place the 2 bushing strips on the opposite side of the tabs as shown above.

CENTER LINK

REMOVE RIGHT TOP HALF

CENTER LINK

TOP CLAMP SCREW

LOWER CLAMP/ UPPER PIVOT SCREWS

3 - **Install the mount while sitting in the passenger side of your vehicle**. Remove the right-top half of the mount and position the mount around the mirror stem as shown above. Reattach the right side of the mount. Make sure the lock washer is still on the lower clamp / upper pivot screw. Leave the top clamp screw loose so the mount can slide along the mirror stem and rotate to the desired location. There may be a plastic oval clip around a wire on the stem, the clip must be removed to install the mount. **Lightly snug screws, do not fully tighten until last step**.

With center link installed

Without center link installed

4 - The center-link may be removed if an overall shorter mount length is needed, depending on your rear view miror and desired position for the dashcam.
